

Official opening of Airbus Helicopters' logistics hub at Albacete, Spain

Albacete, Spain, July 2, 2024 – Airbus Helicopters today officially opened its new logistics hub at Albacete, Spain, which is equipped and operated by Daher as the lead logistics partner.

Located adjacent to the Airbus Helicopters production facility at Albacete, this 50,000 square meter warehouse will optimize operations and create several hundred new skilled jobs for the wider Castilla-La Mancha region. Today's inauguration was attended by Spanish Prime Minister Pedro Sanchez.

During the design of all aspects for the new hub, Airbus Helicopters called on its trusted logistics service provider, Daher. To ensure delivery of the required service level, Daher equipped the new hub with a highly automated and robotized storage system - the first of its kind in the aeronautics industry - using cutting-edge technology from Exotec, a leading French warehouse automation systems specialist.

The hub's ambitious and disruptive technologies reduce the total amount of storage space required, as well as delivering the specified levels of efficiency and responsiveness, while also significantly reducing the need for operators to move around the site. Every aspect of the design focuses on optimizing quality control, reducing human error, maximizing safety and improving operator working conditions.

Inter-site transportation - also provided by Daher - will utilize biofuel-powered trucks that reduce CO₂ emissions by 90% when compared to diesel fuel.

The new facility will eventually employ more than 300 people – 85 percent of them operators recruited and trained by Daher in partnership with the Confederation of Employers of Albacete (FEDA) based on a strictly defined procedure to guarantee the long-term future of the jobs created.

“We're proud to be putting our expertise and innovative capabilities to work for Airbus Helicopters, using technology that positions Daher firmly on the pathway toward Industry 4.0, and fully delivering on the goals of this project,” said Aymeric Daher, CEO of Daher's Logistics division.

About Daher - www.daher.com

As an aircraft manufacturer, industrialist, industrial service provider and logistician, Daher today has approximately 13,000 employees for a revenue of 1.65 billion euros in 2023.

With its family ownership, Daher has been focused on innovation since its creation in 1863. With locations in some 15 countries in Europe, North America and Asia, Daher designs and develops value-added solutions for its aeronautical and industrial customers and partners.

The Daher Group's acquisitions have included the U.S. aerostructures production facility at Stuart, Florida in 2022, and the AAA (Assistance Aéronautique et Aérospatiale) company in 2023.
