

*Daher Aircraft's Kodiak 900 multi-mission demonstrator airplane is loaded at Winston-Salem's Smith Reynolds Airport for a delivery of relief supplies to areas impacted by Hurricane Helene. This aircraft subsequently returned to Daher's Kodiak manufacturing site and final assembly line in Sandpoint, Idaho prior to its participation at the 2024 NBAA-BACE event in Las Vegas.*

## **Daher's TBM and Kodiak aircraft families to be highlighted at NBAA-BACE, along with product and service enhancements**

**Las Vegas, Nevada, October 18, 2024** – The TBM 960 and Kodiak 900 will be featured at Daher Aircraft's exhibit during the National Business Aviation Association's 2024 Business Aviation Convention & Exhibition (NBAA-BACE) in Las Vegas, Nevada next week, with the company also outlining its latest product and service developments.

During the October 22-24 industry gathering, Daher Aircraft will be exhibiting in the NBAA-BACE static display area at Henderson Executive Airport (location: #AD107), with the presence of members from its TBM/Kodiak Care and Procurement teams.

In addition to the top-of-the-line TBM 960, Daher also will be showcasing the new, larger version of its Kodiak utility aircraft: the Kodiak 900. Displayed at Henderson Executive Airport will be the Kodiak 900 multi-mission demonstrator airplane, which has just returned from North Carolina – where it supported Daher's contributions to disaster relief and aircraft repair in the wake of Hurricane Helene.

Daher Aircraft's commitment to continual improvement also will be underscored at NBAA-BACE with announcements on the latest developments for its Kodiak and TBM product lines, as well as for the company's digital initiatives.

- Daher Aircraft's NBAA-BACE press conference is scheduled for Monday, October 21 at 10:10 a.m. in the Las Vegas Convention Center's West Hall, Room W224.

**About Daher – [www.daher.com](http://www.daher.com) / [www.tbm.aero](http://www.tbm.aero) / <http://www.kodiak.aero>**

As an aircraft manufacturer, industrialist, industrial service provider and logistician, Daher today has approximately 13,000 employees for a turnover of 1.65 billion euros in 2023. With its family ownership, Daher has been focused on innovation since its creation in 1863. With locations in some 15 countries in Europe, North America and Asia, Daher designs and develops value-added solutions for its aeronautical and industrial customers and partners.

**About Daher's aircraft product line – [www.kodiak.aero](http://www.kodiak.aero) / [www.tbm.aero](http://www.tbm.aero)**

Daher manufactures two families of single-engine turboprop airplanes: the Kodiak utility aircraft in Sandpoint, Idaho, USA, and the very efficient pressurized TBM in Tarbes, France.

Current TBM versions in production are the TBM 960, with Garmin's G3000 integrated flight deck; and the TBM 910, equipped with the Garmin's G1000 NXi avionics system controlled by a keypad. Both models offer increased automation and superior performance.

The Kodiak versions are unpressurized 8-10-seat airplanes equipped with Garmin's G1000 NXi avionics. The Kodiak 100 series III is powered by a 750 shp. PT6A-34 engine, with the capability of operating on uneven and unimproved runways, as well as on water in the amphibious version. The Kodiak 900 has a 900 shp. PT6A-140A engine, a longer fuselage for more passenger room and cargo space, a cruise speed increase to 210 KTAS, and a greater useful load while offering a maximum range of 1,129 nm. Both offer a unique combination of robust construction, STOL characteristics and remarkable useful load, well-suited for multi-mission operations such as surveillance, MEDEVAC, skydiving and more.

As of October 15, 2024, a total of 354 Kodiaks and 1,230 TBMs were delivered worldwide, with the entire fleet accumulating more than three million flight hours.
